

VoiceFriend for Amazon Alexa

The VoiceFriend Notification Solution now works with any Amazon Alexa-enabled device.

Keep seniors and their families more informed and engaged.

Simple, easy voice-activated notifications

With the Alexa-enabled VoiceFriend Automated Notification Solution, your seniors can listen to their daily schedules, care plans and appointment reminders simply by saying “Alexa, ask VoiceFriend.”

Family members can also use any Alexa-enabled device to keep up to date with their loved one’s activities, events, meal specials and care plans.

Supports those with visual or mild cognitive impairments

By placing Amazon Alexa-enabled devices in common areas or apartments, you can give impaired residents access to vital information about upcoming activities, events or meals through simple voice commands. And because Alexa makes only the latest, relevant announcements, you’ll reduce the risk of confusion.

A powerful marketing tool, too!

Boost the effectiveness of your community tours by including demonstrations of VoiceFriend’s impressive Alexa skill. Prospects and family members will know you’re serious about keeping residents engaged and satisfied—while keeping families and loved ones informed.

Easy to set up, easy to use

- Works with any Alexa-enabled device
- Activate VoiceFriend for Alexa in seconds
- No additional cost
